

## Antifouling compatibility chart

- A** Clean with high pressure fresh water, remove all loose paint and repair if necessary with Underwater Primer.
- B** idem A + light wet-sanding (grain 180-240) on all surface + rinse off before antifouling application.
- C** idem B + apply a coat of Underwater Primer to improve base and provide good adhesion of the new antifouling.
- D** Remove the total existing antifouling and apply a coat of Underwater Primer (adhesion) or Epoxy Primer (adhesion + protection against mechanical agressions + osmosis prevention).
